ARROW® Vascular Access Devices
Protect Your Patients And The Bottom Line Too

YOUR PATIENTS
Did you know more than 90% of hospitalized patients receive a vascular access device (VAD) and 50% of measured hospital-acquired conditions (HACs) are VAD related per pay-for-performance? Catheter-related infection is the most costly of HACs, requiring longer patient stays and an average $46,000 per patient in non-reimbursed expense.¹

YOUR BOTTOM LINE
Fortunately, now hospitals can draw the line. With ARROW® VADs featuring antithrombogenic and/or antimicrobial technology, you can help improve patient outcomes, lower costs, improve efficiency and reduce vascular access-related complications.

Learn how to protect your patients and your bottom line, too.

Need to lower costs?

Learn how working with Cook Medical helped one medical center find savings like these:

- Reduced shipping costs
- Reduced ordering costs
- Fewer SKUs
- Fewer vendors

Read the case study at www.cookmedical.com/hpn. Then, contact your Cook Medical Healthcare Business Solutions representative to learn if you can consolidate orders across 41 physician specialties with Cook’s products.

Read the case study.

Blood Pressure Measurement:
It is who we are, it is what we do.

For nearly 30 years, SunTech Medical has developed blood pressure measurement technology for a variety of applications and environments. We have applied that same expertise to the design of our cuffs, providing consistent and accurate measurements at an exceptional value.

SunTech Medical Offers:
• Soft Disposable Cuffs
• Vinyl, Short-term Use Cuffs
• One-Piece Durable Cuffs
• All-Purpose Durable Cuffs
• Complete range of sizes & industry-standard connectors
• Cuff standardization program
• Full service & support
• No proprietary connectors

INDUSTRY INFORMATION

Associations and Trade Groups

They provide advocacy, continuing education, lobbying, product marketing and, perhaps most of all, networking opportunities for you to share friendships and ideas. Here’s a compilation of noteworthy professional organizations (with their Internet or Web addresses) that fuel the industry’s intellect and performance.
PREVENT HEALTHCARE-ACQUIRED INFECTIONS
an affordable solution that pays for itself

Using oneSOURCE helps eliminate errors in sterile processing, reducing adverse patient outcomes while saving time and money.

If your facility doesn’t sterilize according to Manufacturers’ validated Instruction for Use Documents (IFUs), then there’s risk for higher infection rates, costly citations and damaging publicity. oneSOURCE makes it affordable and easy for your entire facility to follow IFUs as recommended by AAMI ST79. Our online database puts thousands of current IFUs at your fingertips, improving processing efficiency, patient safety and making reimbursements more reliable.

oneSOURCE meets requirements for CMS, Joint Commission & AAAHC Accreditation.

Help take your margins to heroic levels with McKesson Supply Chain Solutions™.

In today’s uncertain times, McKesson Strategic Supply Sourcing™ gives you powerful tools to combat eroding margins. Go into battle armed with our cloud-based tools that simplify functional equivalency comparison and enforce contract compliance at the time of requisition. With an average ROI of 6 to 1* and uptime in as little as 30 days, you too can be a super hero.

www.mckesson.com/supplychain

*Savings shown are conservative spend leakage using price parity identified from a typical supply chain procurement analysis.

Less Running, More Patient Time

A-SMART®

Plus, all A-SMART® Carts are manufactured to ISO 9001:2008 certified standards, and all full-size A-SMART® Carts come with double side-wall construction, stabilizing frame with bumper, soft-grip handles, swivel casters (two locking, one tracking), and ball bearing drawer slides as standard features.

The DUET™ is a completely self-contained suction unit with AC power supply, battery back-up, and internal charger. It meets the American Heart Association recommendations for suction airflow of >30 LPM at the tip of the suction catheter, and the reduced maximum vacuum recommendations for infant or child suctioning of 80-120 mmHg.

REVOLUTIONIZE WORKFLOW
Introducing Carstens’ WALLAroo® with ISONAS™ Technology

WALLAroo® workstations can now be wired to give you real-time tracking of activity, with centralized access control and credentialing for point-of-care medication and EHR stations.

- Integrates with Active Directory for a single source of permission management
- Network-based system - connect WALLAroos with just a standard Ethernet cable
- Uses existing IT infrastructure and PoE technology

Let Carstens create A Roo FOR YOU

Call (800) 782-1524 to schedule a personal demonstration today.

See diagnostic Equipment on page 30
FLOSEAL Hemostatic Matrix Indication

FLOSEAL Matrix is indicated in surgical procedures (other than ophthalmic) as an adjunct to hemostasis when control of bleeding by ligature or conventional procedures is ineffective or impractical.

Selected Important Risk Information for FLOSEAL Matrix

Do not inject or compress FLOSEAL Matrix into blood vessels. Do not apply FLOSEAL Matrix in the absence of active blood flow, e.g., while the vessel is clamped or bypassed, as extensive intravascular clotting and even death may result.

Do not use FLOSEAL Matrix in patients with known allergies to materials of bovine origin. Do not use FLOSEAL Matrix in the closure of skin incisions because it may interfere with the healing of the skin edges.

FLOSEAL Matrix contains Thrombin made from human plasma. It may carry a risk of transmitting infectious agents, e.g., viruses, and theoretically, the Creutzfeldt-Jakob disease (CJD) agent.

FLOSEAL Matrix is not intended as a substitute for meticulous surgical technique and the proper application of ligatures or other conventional procedures for hemostasis.

Excess FLOSEAL Matrix (material not incorporated in the hemostatic clot) should always be removed by gentle irrigation from the site of application.

FLOSEAL Matrix swells by approximately 10% to 20% after product is applied. Maximum swell volume is achieved within about 10 minutes.

The safety and effectiveness of FLOSEAL Matrix has not been established in children under 2 years of age and pregnant women.

Do not use air to remove residual FLOSEAL Matrix from Applicator tip. The Applicator tips should not be cut.

Do not use FLOSEAL Matrix on bone surfaces where adhesives, such as methylmethacrylate or other acrylic adhesives, will be required to attach a prosthetic device.

Adverse Events:

The most common adverse events recorded for FLOSEAL Matrix and the control arm during the clinical trial (during and after application) were anemia, atrial fibrillation, infection, and hemorrhage. Adverse events (rated mild) that were deemed by the surgeon as “Possibly Related” to FLOSEAL Matrix were anemia (1%), mild post-operative bleeding (<1%), and local inflammation (<1%).

Rx Only.

For safe and proper use of this device, refer to the full Instructions for Use.

Call 1.800.423.2090 or Visit www.FLOSEAL.com

See AUTOMATED HAND WASHING/SURVEILLANCE SYSTEMS on page 46
Let us do the heavy lifting.

The Midmark line of Barrier-Free® examination tables is the first of its kind – designed from the inside out with features that help reduce the likeliness of patient and staff injury.

- 18 to 37-inch adjustable surface height
- Adjustable back section
- Up to a 650-pound patient weight capacity
- Optional IQhub® and IQscale® designed to support accurate porting of patient data to the EMR

For more information, call 1-800-MIDMARK or visit midmark.com/hpnguide.

Reach a Higher Level of Patient Care
Optimize patient outcomes and worker performance with Diversey’s Total Solution approach to cleaning and disinfection.

Diversey™ offers an integrated solution of highly effective products, advanced equipment and tools, specialized training and critical performance measurements that help create safer, more satisfying environments of care while enhancing productivity and lowering overall costs.

Available in ready-to-use, wipes or dilution-control formats, our fast-acting disinfectant cleaners have broad efficacy and a leading safety profile while killing key pathogens in as little as 60 seconds.

TASKI® Mobile Work Stations and tools can be customized to reduce worker fatigue and streamline processes for optimum worker performance. Diversey offers customized training and support as well as a cleaning validation system to help ensure consistent results and continued process improvement.

3 words inspire confidence.

Made in Malaysia

100 billion gloves exported to 180 countries every year.

For quality rubber medical devices manufactured to international standards, look to Malaysia. Malaysia – world’s No. 1 in medical gloves, world’s No.1 in condoms, world’s No. 1 in rubber catheters.

The Flexible Inspection Scope includes a distal tip composed of a light source and camera lens at the end of a 50cm, flexible shaft. Designed for instruments 3.2mm in diameter or larger, this is a perfect tool to get a visualization of any potentially soiled tool. Software is included, which installs on both Windows XP & Windows 7, and allows viewing and recording from most computers. Paired with Healthmark Industries’ FlexibleArm, the Flexible Inspection Scope can be securely fastened and moved in numerous ways.

Automated Room Disinfection

53% reduction in hospital-wide incidence of C. diff associated with the decontamination of patient rooms with Bioquell.

Patients admitted to rooms decontaminated with Bioquell technology were 64% less likely to acquire any MRDO.

“Bioquell has greatly reduced our HAI rate... We have also saved hundreds of thousands of dollars by decontaminating unopened/unused supplies removed from patient rooms after discharge.”

- Judy Hodges
  Director of Materials Management
  Memorial Hermann - Texas Medical Center

It is very difficult for a healthcare organization today to comply with the Affordable Care Act without adopting the tenets of Cost, Quality, and Outcomes."
- Ed Hardin, Vice President, Supply Chain Management, CHRISTUS Health

AHRMM members from across the country have shared how they leverage Cost, Quality, and Outcomes (CQO) to reduce costs while improving patient care and driving greater financial outcomes for their healthcare organizations.

Review the case studies on the AHRMM website to discover proven ways to adopt the CQO fundamentals and learn about key CQO initiatives and strategies implemented by those successful early adopters. Decide if these best practices can support your successful transition to a more integrated care delivery model.

Read the case studies at
www.ahrmm.org/CQO_Case_Study

Join Association for Healthcare Resource & Materials Management (AHRMM), a personal membership group of the American Hospital Association, for exclusive access to professional education, tools, and a powerful network of more than 4,300 members, representing various stakeholders across the healthcare supply chain.

68 Industry Guide 2015 • HEALTHCARE PURCHASING NEWS • www.hpnonline.com
Tork dispensers are designed for a hands-off experience, reducing the spread of germs and eliminating waste. Just another way Tork helps deliver healthier returns.
Disinfect TEE probes in 5 minutes!

Printed Verification
Upon a successful disinfection cycle, a printed confirmation is provided to identify probe, individual, disinfectant lot number and the time/date of disinfection.

Probe and High-Level Disinfectant Holder
Custom, form fitted holders safely and securely hold the TEE probe to minimize potential probe damage that is associated with manual reprocessing. TD-5* high-level disinfectant container is held securely to deliver the exact measured dose for proper high-level disinfection.

Touch Pad Interface
Vividly labeled key pad with clear prompts on the LCD guiding the user through the process.

Automatic Waste Disposal
Upon completion of the disinfection cycle, the TD 100* automatically pumps the TD-5* disinfectant to drain and eliminates the potential for over-soaking the TEE probe.

Gas Phase Bonded Filter
Chemisorptive bonded filter eliminates exposure to harmful fumes and vapors associated with the TD-5* high-level disinfectant. Adsorbs and neutralizes Glutaraldehyde fumes.

U.S. Patent No. 7,641,873
